Specializing in the production of disposable diapers and pants

Provide customers with professional ODM & OEM service. All the diapers and pants are produced strictly under ISO9001 quality management system.

About Us

With floor space over 60000m² in Meishan City, Sichuan Province, China. It has been specializing in R & D, production and sale of baby diapers and pull-up pants, with professional R & D team, advanced production equipment and testing instruments to offer professional ODM & OEM service for customers.

As a professional disposable diapers manufacturer, it has 10 automatically production lines for each core part of disposable diapers, and more than 400 workers for production, quality control, pack, delivery, R&D, sales, etc, with annual sales turnover of 0.1 billion USD.

OEM / ODM Service

We offer ODM and OEM services to meet different clients' requirements. For example, we can do your own brand and private label on package of baby diapers, pull up pants, etc.

If you need OEM service of printing your own brand on each piece of diaper or pants, we can do that, too.

Or if you need ODM service in process technology, material, design, etc, you can send your requirement, the R & D team will try their bests to work on that.

To make sure OEM or ODM customization move as your expected, please do following steps to save time.

- ❖ **Send your requirements to salesman:** such as order quantities of diaper, pants, etc.
- ❖ **Confirm purchase and arrange prepayment:** The order is confirmed and started.
- ❖ **Send LOGO in original file:** Brand name, design requests, packaging details, etc. For example, you need baby diaper Small size, 50pcs per bag, bag in your own brand, etc.
- ❖ **Design and confirm:** Designer will do design for bag, and send to you for check. If any modifications are required, the designer will modify according to your requests, and re-send to you until you confirm.

OEM Diaper

Which parts of baby diaper could be personalized?

Machinery Equipment

The core material of baby diapers is composed of SAP+ fluff pulp. SAP (superabsorbent polymer) is shown below. The main material absorbs the liquid and then turns into a gel that locks in water. Capacity can be adjusted. Change the SAP quantity. The more SAP content, the higher the absorbability.

3-8kg

6-11kg

9-14kg

12-17kg

Pocket type

The inside bag of baby diapers can be printed with your logo and your favorite design. Bag type and material can also be selected.

Carrier Bag

One sealing side in the bottom, cheaper in material cost.

Handle Bag

Three sealing sides, in left, right and bottom side, easier for carry.

Biodegradable EPI Bag

Regular PE Bag

Biodegradable Kraft Bag
